EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Joe Nieh on 10/5/06.

The application has been amended as follows:

Cancel non-elected claims 6-62.

Claims 1-5 are allowed.

The following is an examiner's statement of reasons for allowance: None of the prior art, alone or in combination, teaches the Applicant's invention of a sliding piston opening means comprised of a length of the tube with one or more openings, a sliding piston in the tube and a compressible tubular housing, all structured as claimed wherein when the piston is in the second open position, said piston is located at the openings (as shown in Figure 4). It is noted that the piston in the Bonningue reference (as applied in the Final Rejection mailed 3/22/06) is not at the openings when the piston is in the open position (See Figure 3C) but is rather located at a position which is not at (i.e., at the same longitudinal position) the openings.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
